Synopsis

Whether you're a technical writer, help author, or book indexer, you can bootstrap yourself into the online indexing world with RoboHELP. Why should a help or information system have an index when it already has a table of contents and full text search? When should you index? How do RoboHELP's Index Designer and Smart Index Wizard affect the process? Discover answers to these questions and others in Successful Indexing With RoboHELP HTML Edition. Let Sageline Publishing's Professional Bootstrap Series help you get started. The first section, Online Indexing Basics, provides an introduction to the history and purpose of indexing, as well as an explanation of the relationship between HTML files and RoboHELP in the indexing process. The second half of the book, Indexing Inside RoboHELP, provides detailed procedures to help you make the most of RoboHELP as you index. You will learn tips and tricks along the way...and you will be able to deal with problems that are addressed only in this workbook. It is almost as important to learn what not to do as it is to learn what you should do. Whether used for class materials or as a self-study guide, this workbook can get you successfully started with HTML indexing using RoboHELP HTML Edition.
