FastSLAM: A Scalable Method For The Simultaneous Localization And Mapping Problem In Robotics (Springer Tracts In Advanced Robotics)

Synopsis

This monograph describes a new family of algorithms for the simultaneous localization and mapping (SLAM) problem in robotics, called FastSLAM. The FastSLAM-type algorithms have enabled robots to acquire maps of unprecedented size and accuracy, in a number of robot application domains and have been successfully applied in different dynamic environments, including a solution to the problem of people tracking.

Book Information

Series: Springer Tracts in Advanced Robotics (Book 27)

Hardcover: 120 pages

Publisher: Springer; 2007 edition (March 5, 2007)

Language: English

ISBN-10: 3540463992

ISBN-13: 978-3540463993

Product Dimensions: 6.2 x 0.4 x 9.4 inches

Shipping Weight: 10.4 ounces (View shipping rates and policies)

Average Customer Review: 1.0 out of 5 stars [See all reviews](#) (1 customer review)

Best Sellers Rank: #3,969,969 in Books (See Top 100 in Books) #24 in [Books > Computers & Technology > Programming > Software Design, Testing & Engineering > Localization](#) #568 in [Books > Computers & Technology > Computer Science > AI & Machine Learning > Machine Theory](#) #823 in [Books > Computers & Technology > Computer Science > AI & Machine Learning > Computer Vision & Pattern Recognition](#)

Customer Reviews

Although I paid more for express purchase, and I have already paid for the book, I still have not received the book. DHL sends me notification messages saying that the product is in transit. I m very disappointed. Over the past few years, I've done several purchases by and this has never happened before.
