Mainly a book of illustrations identifying Native American artifacts. I was expecting a more of a how to or at least a list of materials typically used. If it were free I may not be disappointed or if I had no expectations at all.

I love the history of making stuff from scratch. This shows how the Native Americans (First Citizens) produced what they needed, which is something we all may need some day if our economy keeps going like it is. Need a job? Why not learn to produce what you need, and sell the excess?

Some of the crafts and skills are still being used today. If more people would go back and do things the way the American Indian did them we wouldn't have to tolerate kerosene soaked charcoal or the smell of lighter fluid...both harmful to cook over.

It is a bare bones how to do it; from how to build shelters to all you need to know about camping out using indian style knowhow. the drawings are okay but get a good field guide as opposed to using the identify edible plants chapters, and the tracks ID for animals. there is some beadwork, clothing, and decoration here but no real background aside from very short descriptions. there is a nice bit on tanning leather and tool making but it is pretty basic and will depend more on practice than the instruction given.

This is a great resource book, plainly written and easy to follow with nice hand drawings. Now I will find a hard copy to add to our vast collection of American Indian history. My Spouse demonstrates many of the listed skills for the local community and schools. This will make a great gift for him, and a source material to recommend to inquiring minds. We live in Cherokee Nation.

It wasn't knock-your-socks off awesome, and it wasn't totally a waste. Purchased it for \$0.99 as a Kindle book, so I was pretty satisfied. It has a pretty rough and ready, basic description of multiple topics. I skipped the chapters on beading and stuff like that 'cause I'm just not interested in that. It did have a small section on making bows, among other weapons, which I was interested in. I also was interested in reading the section on making shelters, not only the stereotypical 'tipi'. Again, the instructions were no super-easy to follow but they also won't overly wordy or super long...brevity has it's price. I'm pretty sure if I actually had the materials in front of me, and was methodical about reading the instructions several times, all the way through (firstly before I got my materials, then just before I started, then again as I was working through the process as needed), I probably would come out with a reasonable result. I was happy to read the author's note asking that people respect the traditions and individual importance of what native peoples have already painted onto their tipis, it reinforced what one of my random college classes had mentioned: quite often the designs seen on tipis that are 'traditional' are as personal and individual as a diary and a fingerprint... so please, folks, instead of copying someone else's design, use it as inspiration and create your own design if you decorate your tipi. I haven't covered every topic in my review which is covered in the book. I'd advise taking advantage of the preview/sample or 'look inside' option to get a better feel for this book (or any book!) before you buy it. I wouldn't spend more than \$5-6 on the book, unless I could definitely look at every page before I purchased it to see if it was going to be worth it for my situation and needs. However, at 99 cents, I feel it was well worth the gamble.

I had seen this book years ago in the library. It's full of all sorts of useful stuff. Well, useful if you're into nature. I'm excited to try doing some of the stuff in it, especially trying to make a bow (although it's probably gonna take me a few tries).

I was looking for a craft and skill book for upper elementary students. Although this book has many wonderful ideas, most of it was not useful for individual and small group projects for this grade level. This book is more appropriate, in my opinion, for individuals or groups who have lots of time for the projects.
