Customer Reviews

Not worth \$32. While I applaud the author's basic tenet: respect the old and, when updating, do no harm to its integrity, this isn't much of an owner's guide. There just isn't a whole lot here. Maybe it's for beginners or folks thinking about buying an old house. Dunno. For someone with a little experience owrking on old houses, there are more comprehensive and detailed resources out there to help you. I've restored a 1920's NYC apartment, a 3200 sq ft 1880's Eastlake Victorian in upstate NY and a small 100+ year double-walled adobe in NM. I found some new and useful tips/advice/warnings on treatments and use of certain chemicals (wood strippers). But based on other reviews here, I expected to read more on most subjects. For instance, I was hoping for an in depth explanation of how to evaluate the pros and cons of a property from an expert's point of view.

Four and a half pages. However, I loved the step-by-step how to repair double hung windows. I wish I'd had it for the 20+ I fixed myself but it wasn't hard to figure out. He's so right: don't replace, repair those. Other strengths: fixing sagging plaster (but nothing on removing wallpaper from those walls!), working with various materials and a life expectancy of buildling materials chart. But these sections are short for the most part. And too many leave out really relevant things, such as safe wallpaper removal. Specifics: The book is in large print format,@180pp of core text (207 pp tota) would boil down to just over half that length in typical 12 pt font typeface and typical line spacing. It's big and bloated to seem like more than it is, sadly.
